CHARDINE KIRCHNER

- ✓ DID YOU KNOW THAT DOGS WITH PREDOMINANTLY WHITE COATS CAN BE PRONE TO DEAFNESS?
- ✓ BUT APPROXIMATELY 85 DIFFERENT BREEDS HAVE BEEN REPORTED TO CARRY THE TRAIT THAT CAUSES CONGENITAL DEAFNESS.
- ✓ DOGS THAT CARRY THE PIEBALD GENE (AFFECTS DISTRIBUTION AND AMOUNT OF WHITE COLOUR) ARE OFTEN AFFECTED BY DEAFNESS.
- ✓ BLUE EYES, RESULTING FROM AN ABSENCE OF PIGMENT IN THE IRIS, IS COMMON WITH PIGMENT-ASSOCIATED DEAFNESS BUT IS NOT, IN OR OF ITSELF, AN INDICATION OF THE DEAFNESS GENE.
- ✓ CONGENITAL DEAFNESS IN DOGS IS MORE PREVALENT IN CERTAIN BREEDS AND IS LINKED TO COAT COLOUR.
- ✓ CONGENITAL MEANS THAT A HEALTH CONDITION IS PRESENT AT BIRTH AND NOT ACQUIRED AS A RESULT OF SOMETHING ELSE
- ✓ COAT COLOURS ASSOCIATED WITH DEAFNESS:
  - PIEBALD
  - MERLE
  - ROAN
  - WHITE

SOLUTION to your Animals hearing issues.

Qualified mobile BAER (Brainstem Auditory Evoked Response) testing technician available, in association with certain Veterinary practices

- ❖ Rant-en-Dal Animal Clinic in Krugersdorp
